

# Network-Relevant Functions

eBill

Annex 3 to the Framework Network Partner Agreement

## 1 Terms

---

Unless there are specifications to the contrary, the terms used in this Annex have the same meanings as in the Framework Network Partner Agreement.

## 2 Network-Relevant Functions

---

The following list shows which functions are rated as network-relevant.

Invoice recipients and issuers should encounter identical conditions when using the eBill service. The functions listed below, which are outlined in the Handbook for Network Partners, are therefore declared network-relevant.

Functions
Register invoice issuer
Edit invoice issuer data
Deregister invoice issuer
Query invoice recipient
Deliver transaction
Obtain login data
